EDUCATION

Narula Institute of Technology

2022-2026

B.Tech in Computer Science and Engineering (AI-ML)

CGPA: 7.76

SKILLS

Languages	Python, JavaScript, C++, HTML, CSS
Frontend/Backend	React.js, React Router, Material UI, Tailwind CSS, Bootstrap, Axios, Vite, Node.js, Express.js, FastAPI, REST APIs, JWT Auth, Socket.IO
AI/ML	RAG, MCP, LangChain, LangGraph, Gemini API, Groq, LLMs, AI Agents, Agentic AI, Multi-Agent Systems, Tool Calling, Embeddings, Vector Search
Databases	PostgreSQL, MongoDB, MySQL, Redis
Tools & Platforms	Git, GitHub, Docker, Docker Compose, Kubernetes, kubectl, GitHub Actions, CI/CD, Render, Postman, Trivy
Core Concepts	Data Structures & Algorithms, OOPs, DBMS, OS, CN

PROJECTS

NovaGPT | [Live Demo](#) | [GitHub](#)

Full-stack AI assistant built with **React.js**, **Node.js**, **Express.js**, **MongoDB**, **Google Gemini API**, and **LangChain** featuring **RAG**, **MCP**, **agentic workflows**, **Docker**, and **Kubernetes**.

- Implemented secure **JWT authentication**, thread-based conversations, and persistent chat history using **MongoDB Atlas**.
- Integrated **LangChain** with Gemini to orchestrate agent workflows using **RAG**, **MCP tools**, **tool calling**, and execution tracing.
- Built a custom **MCP server/client over Stdio** with dynamic tool discovery and calculator/current-time tools.
- Containerized and deployed the application using **Docker Compose** and **Kubernetes**, with GitHub Actions for automated builds, linting, and **Trivy security scanning**, plus **Ingress**, **ConfigMaps**, **Secrets**, **health probes**, **HPA**, **rolling updates**, and **rollback**.

TravelMind AI | [Live Demo](#) | [GitHub](#)

Built a production-oriented multi-agent travel planner using **Python**, **FastAPI**, **LangGraph**, **Groq**, and **PostgreSQL** to orchestrate specialized agents for flight, hotel, weather, itinerary, and validation tasks.

- Designed a **LangGraph-based multi-agent workflow** where specialized AI agents research travel requirements and combine findings into a unified trip plan, with support for **natural-language prompts** and structured trip inputs.
- Integrated **MCP** with **Tavily**, **AviationStack**, and **OpenWeather APIs** for web research, flight information, and weather forecasts.
- Implemented persistent trip state with **PostgreSQL** and **Redis caching**, enabling session continuity and reducing repeated API/tool calls.

Meetlify | [Live Demo](#) | [GitHub](#)

Developed a real-time video conferencing platform using **MERN Stack** and **Socket.IO**.

- Engineered **WebRTC peer-to-peer video/audio calling** with Socket.IO signaling, supporting multi-user rooms with live chat, screen sharing, and secure token-based authentication.
- Built a responsive **React-based interface with camera/audio controls**, **screen sharing**, **meeting lobby**, and **real-time chat** for a seamless conferencing experience.
- Designed MongoDB schemas for User and Meeting data with persistent meeting history and deployed the application on **Render**.

CERTIFICATIONS

- Oracle Agentic AI Certified Foundations Associate ([Certificate](#))
- Successfully completed the **Delta (Full Stack Web Development)** certification from **Apna College**, gaining hands-on experience in frontend, backend, and database development. ([Certificate](#))
