## EDUCATION

Narula Institute of Technology

2022-2026

B.Tech in Computer Science and Engineering (AI-ML)

CGPA: 7.76

## SKILLS

|                   |                                                                                                                                          |
|-------------------|------------------------------------------------------------------------------------------------------------------------------------------|
| Languages         | Python, JavaScript, C++, HTML5, CSS3                                                                                                     |
| Frontend/Backend  | React.js, React Router, Material UI, Tailwind CSS, Bootstrap, Axios, Vite, Node.js, Express.js, EJS, REST APIs, JWT Auth, Socket.IO      |
| AI/ML             | RAG, MCP, Gemini API, LLMs, AI Agents, Agentic AI, Tool Calling, Embeddings, Vector Search, Prompt Engineering, LangChain, Responses API |
| Databases         | MongoDB, MySQL                                                                                                                           |
| Tools & Platforms | Git, Docker, GitHub Actions, CI/CD, Render, Nginx, Postman, bcryptjs, React Markdown, KaTeX                                              |
| Core Concepts     | Data Structures & Algorithms, OOPs, DBMS, OS, CN                                                                                         |

## PROJECTS

NovaGPT | AI Chatbot / Agentic AI Application | [Live Demo](#) | [GitHub](#)

Full-stack AI assistant built with **React.js**, **Node.js**, **Express.js**, **MongoDB**, and **Google Gemini API**, featuring an MCP-based agent architecture with **Docker** and **CI/CD** deployment.

- Developed secure **JWT authentication**, bcrypt password hashing, thread-based chat management, and persistent history using **MongoDB Atlas**.
- Implemented a custom **MCP server/client over Stdio** for dynamic tool discovery and execution, including calculator and current-time tools.
- Built an AI routing layer integrating **RAG**, **MCP tools**, and **Gemini responses**, with tool-execution tracing and document-based Q&A.
- Created a responsive React UI with **light/dark/system themes**, **Markdown**, **LaTeX**, and **syntax-highlighted code**, plus retry handling for Gemini failures.
- Containerized frontend/backend using **Docker Compose** and automated **GitHub Actions CI/CD** with ESLint, production builds and **Trivy security scanning**; deployed on **Render**.

Meetlify | [Live Demo](#) | [GitHub](#)

Developed a real-time video conferencing platform using **MERN Stack** and **Socket.IO**.

- Engineered **WebRTC peer-to-peer video/audio calling** with Socket.IO signaling, supporting multi-user rooms with live chat, screen sharing, and secure token-based authentication.
- Built a responsive **React-based interface with camera/audio controls**, **screen sharing**, **meeting lobby**, and **real-time chat** for a seamless conferencing experience.
- Designed MongoDB schemas for User and Meeting data with persistent meeting history and deployed the application on **Render**.

Wanderlust | [Live Demo](#) | [GitHub](#)

Developed a hotel listing website using **HTML**, **CSS**, **JavaScript**, **EJS**, **Node.js**, **Express.js**, and **MongoDB**.

- Built RESTful CRUD endpoints across listings, users, and reviews with Mongoose models, and **Passport.js** session-based authentication with ownership/authorization checks.
- Implemented server-side validation, error handling, and responsive EJS views to improve application reliability and user experience.
- Integrated **Cloudinary**/Multer for image uploads and **Mapbox** for location-based listings; deployed on **Render**.

## CERTIFICATIONS

- **Oracle Agentic AI Certified Foundations Associate** ([Certificate](#))
- Successfully completed the **Delta (Full Stack Web Development)** certification from **Apna College**, gaining hands-on experience in frontend, backend, and database development. ([Certificate](#))
- Built and deployed **AI-powered applications** using **Google AI Studio**, with practical experience in prompt engineering, AI application design, and cloud-based deployment workflows. ([Certificate](#))
